SentinelPay: class, sequence and workflow diagrams

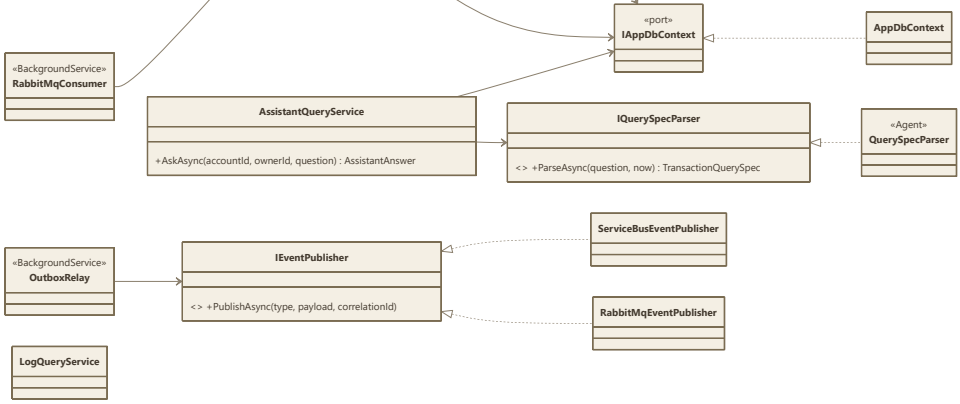

Every name below comes from the scaffold in `sentinelpay-scaffold.zip`. Each block is plain Mermaid, so you can paste it into GitHub, Medium (via image export) or an IEEE figure.

1. Class diagram: domain model

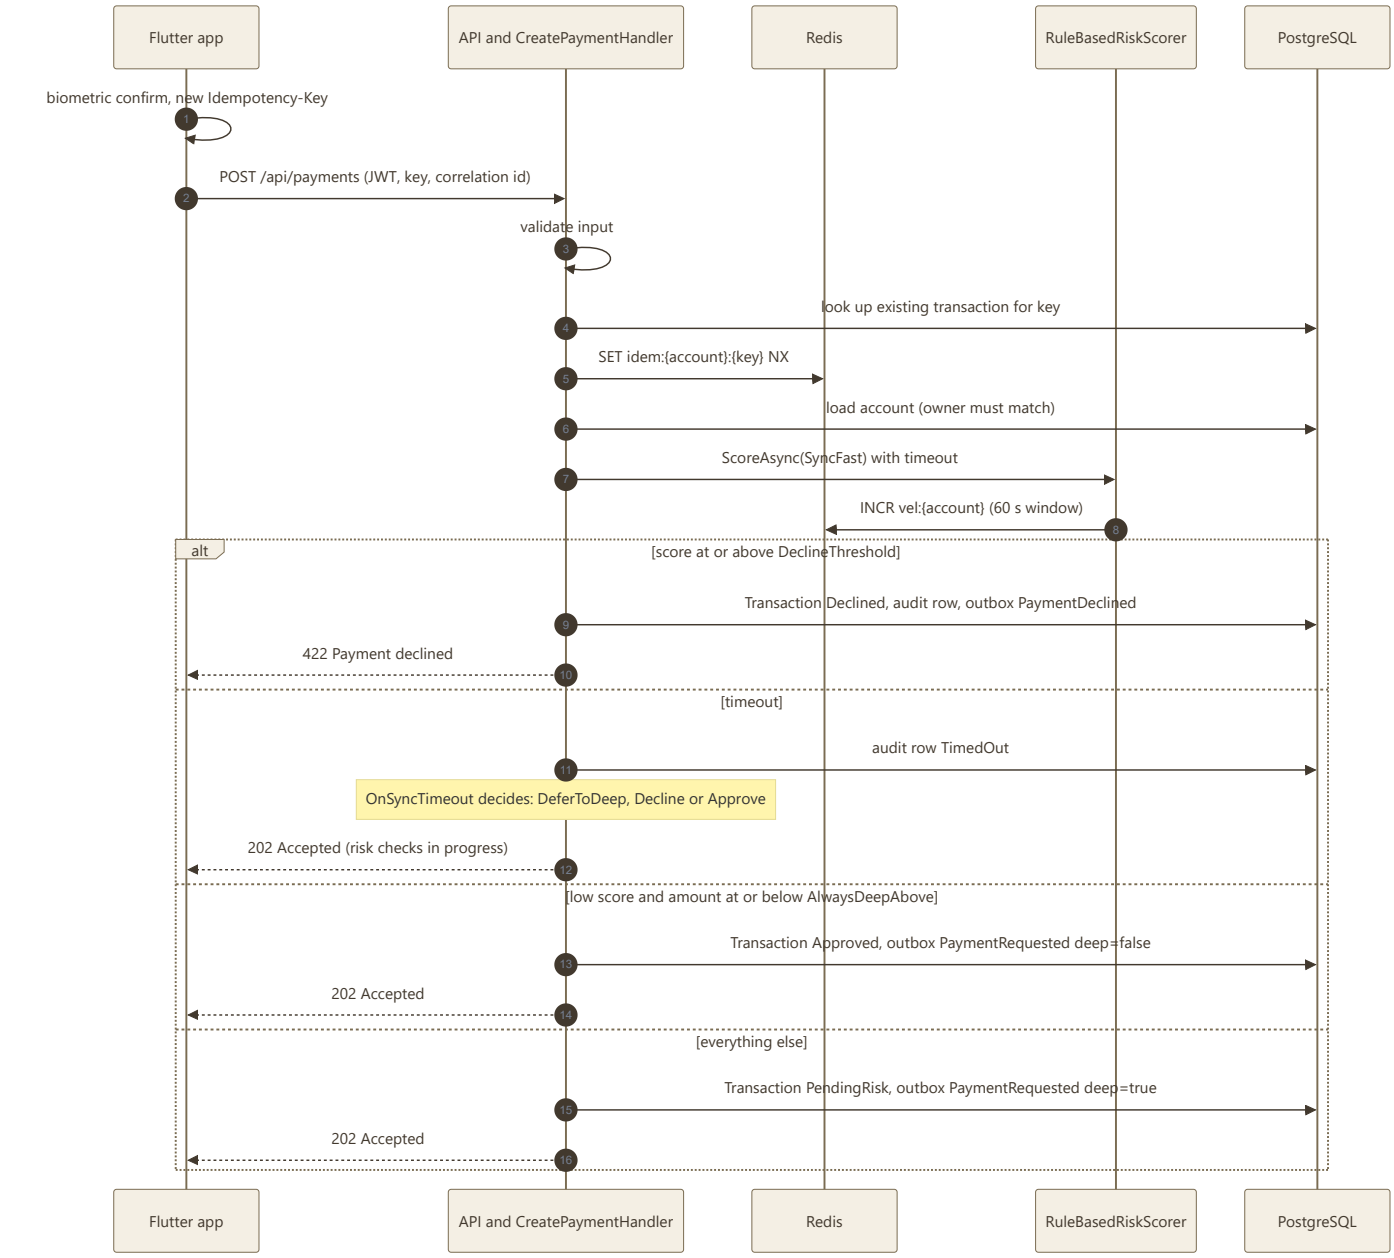

2. Class diagram: application, ports and adapters

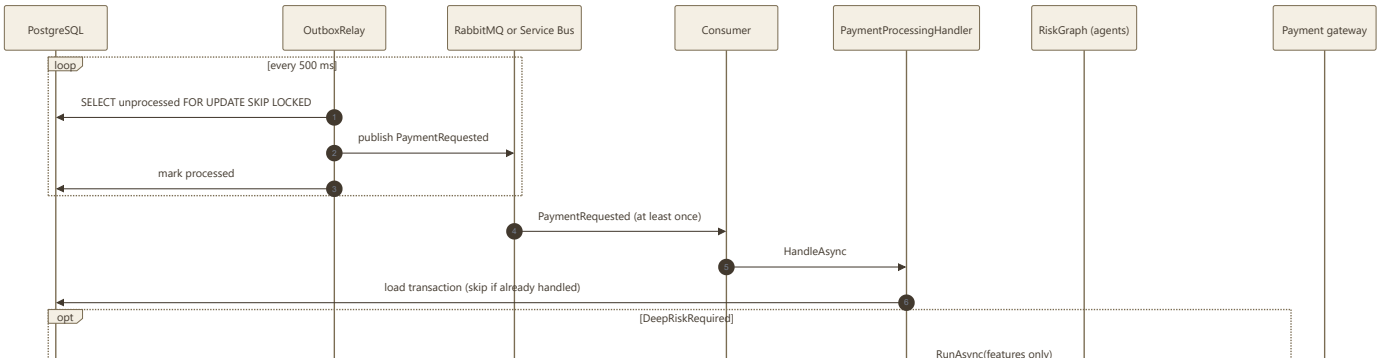

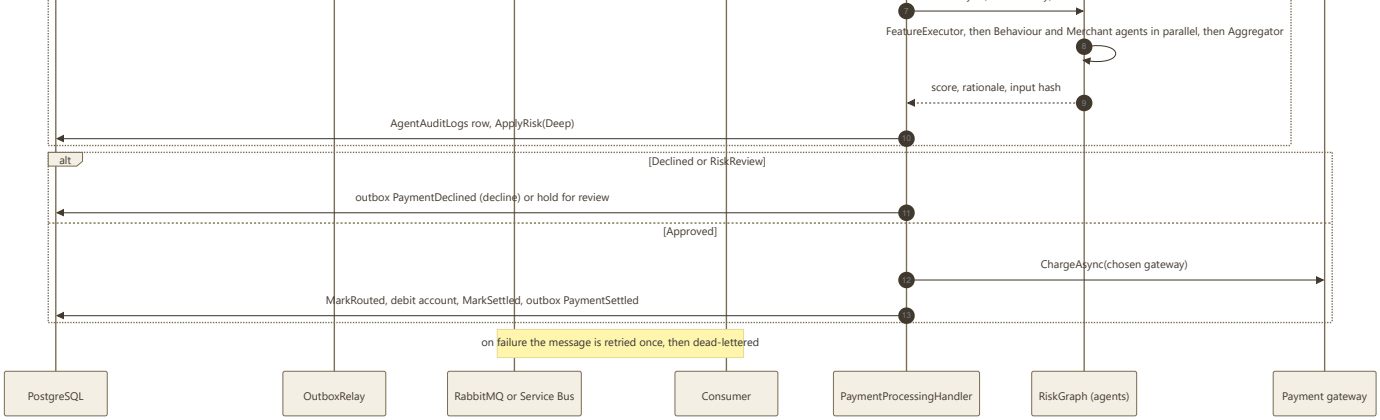

3. Sequence: create a payment (Hybrid mode)

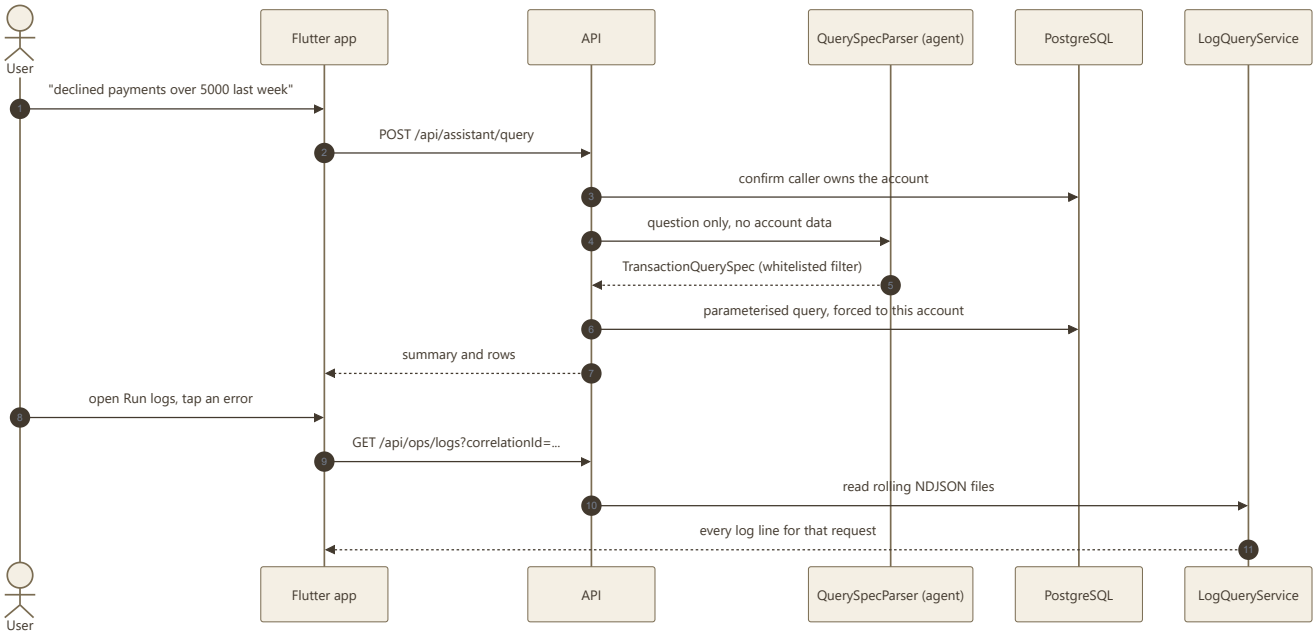

4. Sequence: outbox, agents, gateway, settlement

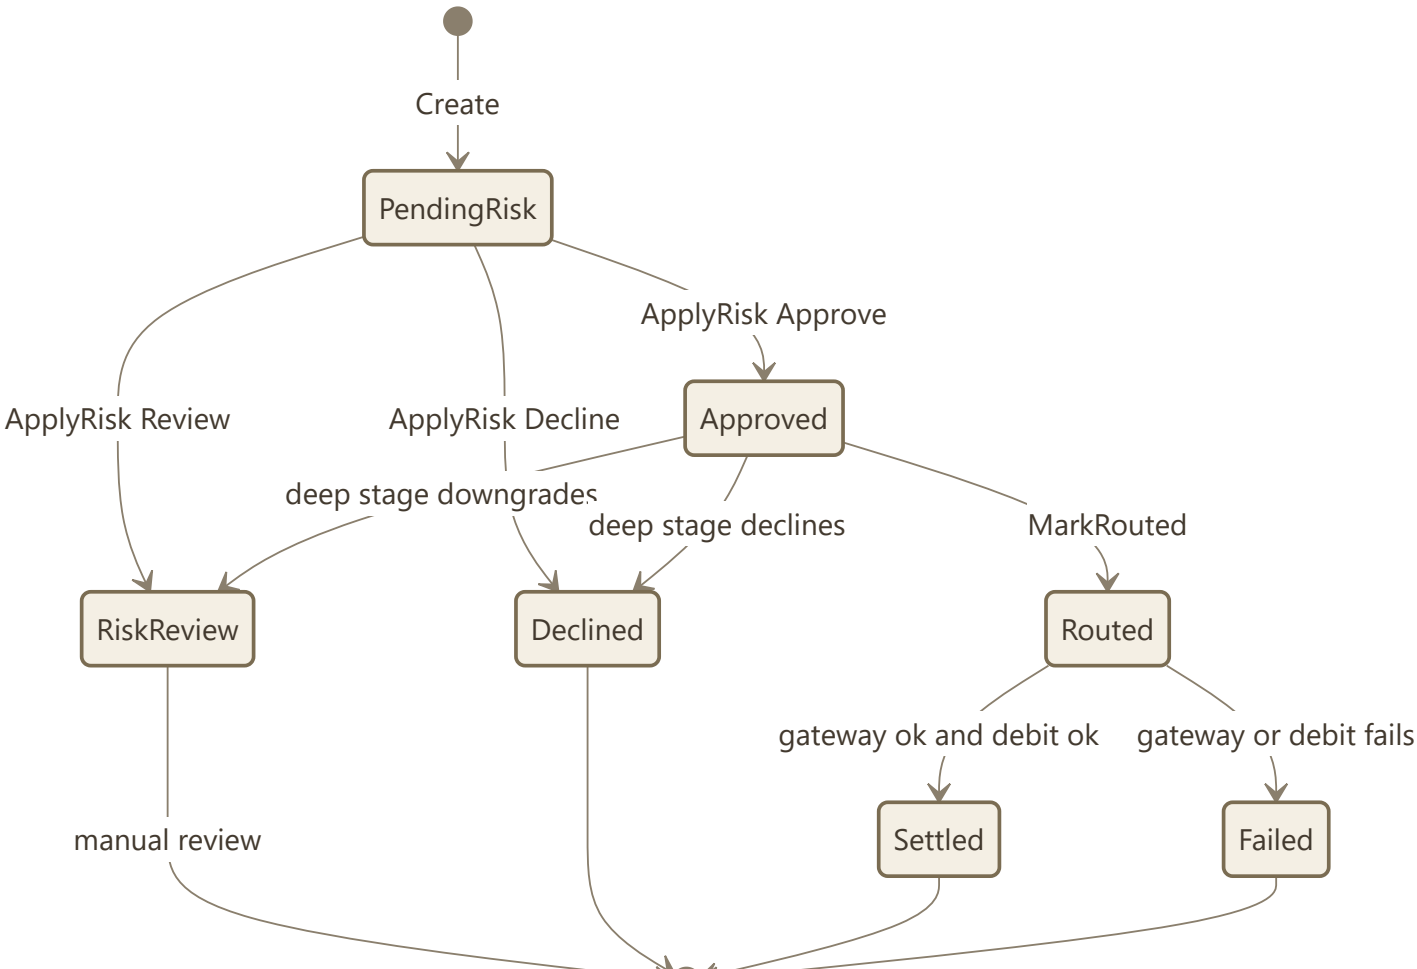

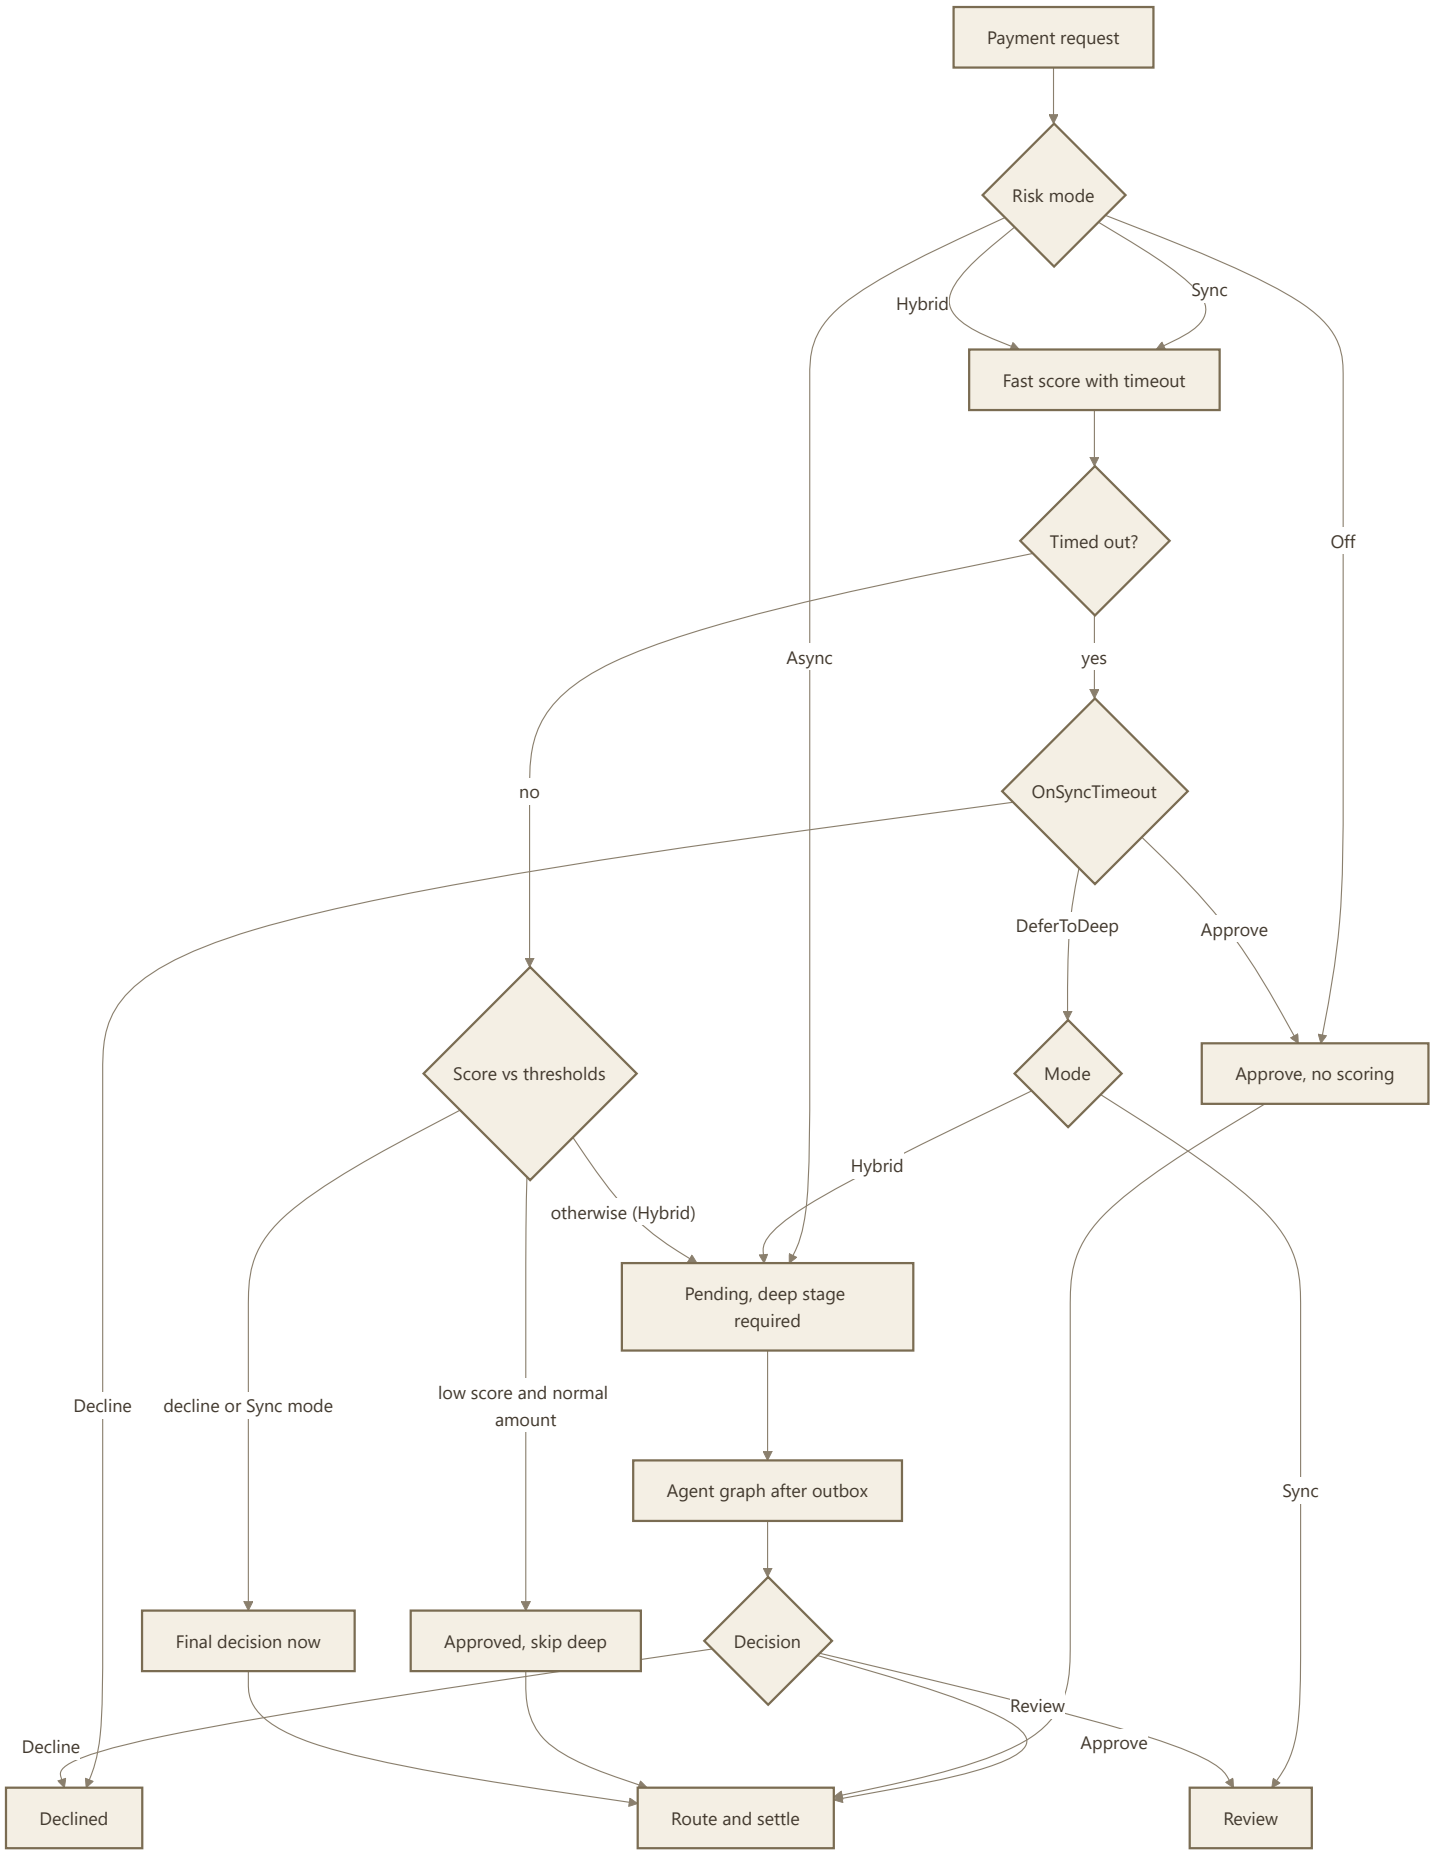

5. Sequence: natural-language query and log trace

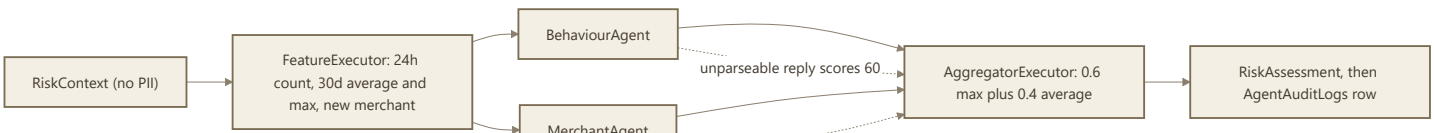

6. Workflow: transaction lifecycle

7. Workflow: choosing the risk path

8. Workflow: agent graph
